Our mission statement. Create.Future.Together.

Create.

Innovative technologies for processing web-shaped materials are the historically grown core of the Jagenberg Group and have been our focus for over 140 years. We design creative and future-oriented solutions for our customers. Our thinking is entrepreneurial and our culture mid-sized. Short decision-making processes, a high level of action competence and an agile organization enable us to take successful steps into the future quickly and decisively.

Future.

We are ready to face the dynamic changes that the future holds for all of us - be it technological progress, digitization or climate change. Based on our values, we as a Group are actively working on innovative solutions to harness these megatrends in an economically and ecologically sustainable way for our customers and ourselves.

Together.

Together we are strong! This motto characterizes the cohesion in our group. We face the future as a strong team of doers and creative minds. Together with our customers, suppliers and partners, we create the future. Through a fair and trusting exchange, we learn from each other and build long-term and reliable partnerships together.

Our values. What we care about.

Trust.

Integrity.

Reliability.

Fairness.

Respect.

Openness.

Honesty.

CARING FOR
THE FUTURE.

Sustainability Strategy. Caring for the Future.

Our sustainability strategy systematically signifies our commitment to take responsibility and minimize negative environmental impacts.

We respond to challenges by making the most of our strengths and skills and sharing our knowledge within the Group and with our suppliers and customers. Our comprehensive approach enables us to adopt new perspectives and develop sustainable solutions.

Sustainability Strategy. Our Sustainability Report.

Climate action

Resource awareness

Attractive employer

Corporate governance

Sustainability Strategie. Guiding themes.

Sustainability Strategy.

Our fields of action.

We concentrate on the following action areas:

Climate action

We support the Paris Agreement and are actively helping to reduce carbon emissions.

Resource awareness

We establish a responsible approach to the use of resources along the entire value chain.

Attractive employer

As an employer, we attach great importance to treating our employees responsibly and respectfully. We create attractive conditions to promote personal and professional development.

Responsible corporate governance

In line with our value system, we act on the basis of irreproachable conduct from an ethical and legal perspective.

02
Jagenberg
Converting
Solutions (JCS)

Integrate.Converting.Competences.

Your turnkey solution for the production of innovative foils for Surface and Energy applications.

The company at a glance

JCS integrates competences and technologies into a single solution for applications in the Energy and Surfaces industries. We thereby extend our own products with state-of-the-art components and services from other members of Jagenberg Group.

Solutions for your battery foil production

Integrate. Converting. Competences.

Our product portfolio

Production equipment
- turnkey

What we offer

- State-of-the-art wet coating equipment - turnkey, suiting your individual needs.
- Integration of components from Jagenberg Group companies and 3rd party suppliers.

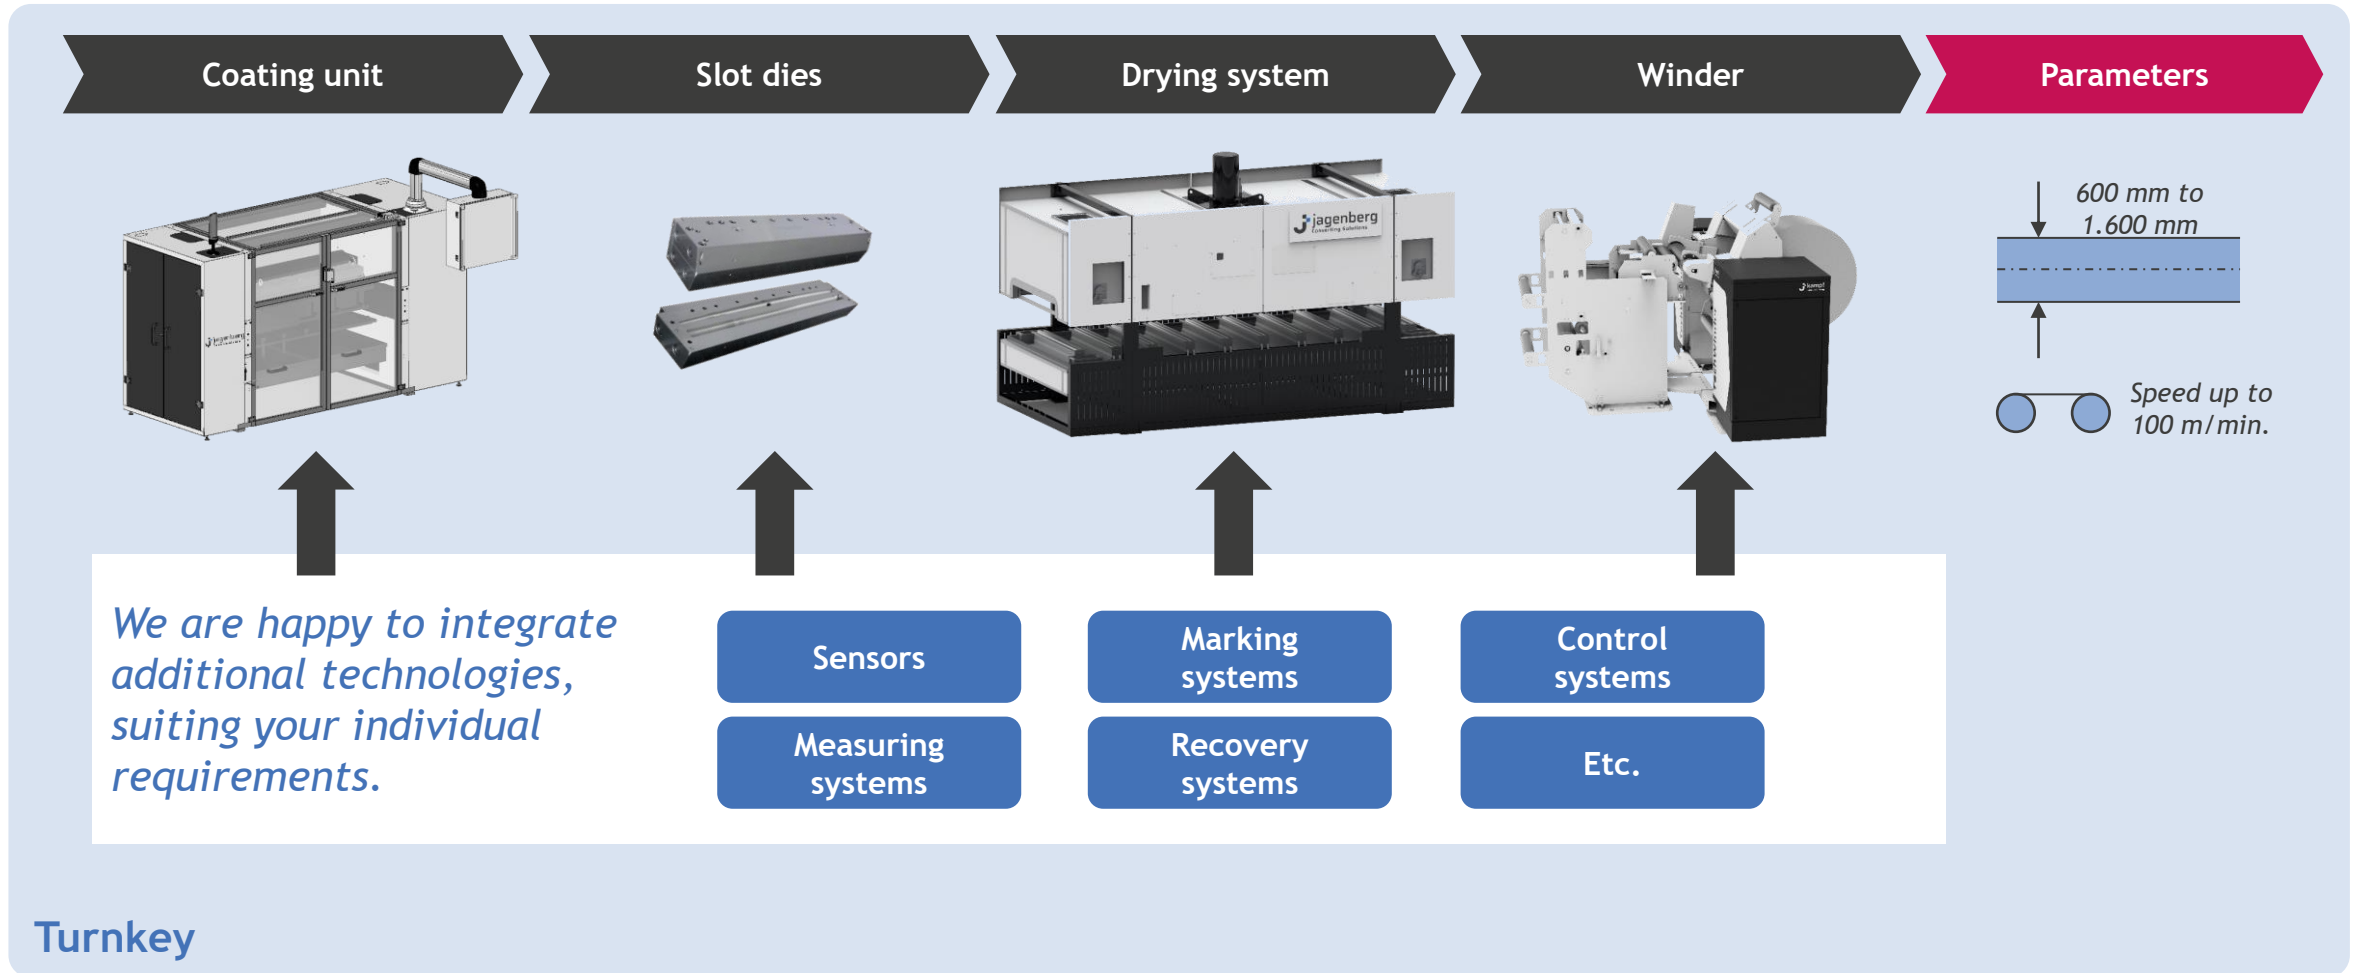

Components for
your individual
application

What we offer

- Components that are made for high performance and high precision.
- Proven technology for the battery industry.
- Made for your individual requirements

Configure your equipment with our standard components

Turnkey

We can support you with our process know-how and technologies

Coating

Fluid measurements

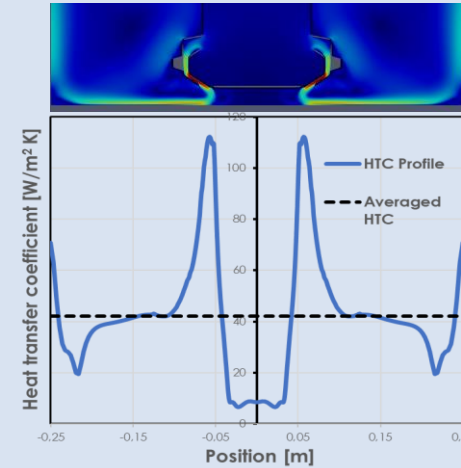

CFD simulations

Process window calculations

Practical feasibility studies (lab scale)

Drying

Drying optimization

Drying curve calculations

CFD simulations

High precision Slot Die

Tailor-made equipment that matches the coating process and plant design.

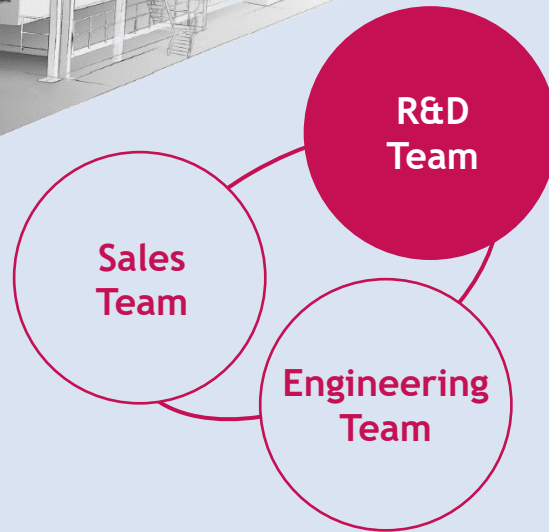

LamiFlow Nozzle

The patented impingement-free nozzle provides a homogeneous temperature profile at high drying performance.

We invest in the development of our equipment

Associations & Research Institutions

How we can contribute to your success

Integrate. Converting. Competences.

We focus on providing innovative and sustainable solutions for the battery industry.

Our added value.

Advanced Solutions.

Increasing productivity.

Total cost of ownership.

Reduction of waste.

Carbon footprint.

Advanced technologies as enabler.

Turnkey equipment - scope and contractual setup

Our offering

Converting.Processing.Unlimited.

Special machine engineering company which develop special solutions for processing and finishing of web-shaped materials

Turret rewriter

Slitting unit

Turret unwinder with auto-splice

Slitter.Winder.Kampf.

The world's largest manufacturer of winders and slitters for demanding web materials and technological leader for 100 years

Rewinder, slitter, unwinder.

In the manufacturing processes of cathodes and anodes for Lithium-Ion Batteries, turret unwinder and turret rewriter type EvoWinder are used before and after coating lines and calender systems. The specially designed turret systems enable continuous operation without any restrictions in speed and productivity.

Our offering

Integrate. Converting. Competences.

Specialist for coating technologies that develops and engineers the right solution for your individual application.

Coating Unit

High precision die coater.
High speed coating from pilot- to large-scale production.

Our offering

Integrate. Converting. Competences.

Partner for state-of-the-art drying technology engineered and built in Germany

Advanced drying technology.
The drying process affects the final battery performance to a large extent. We fit the best dryer for your requirements.

Dryer

Our offering

Jagenberg Group

Automation.Drives.Future.

Partner for all questions concerning drive and automation technology. Conceptual design, construction and production of electrical and switchgear systems

Drive technology

Mechatronic drive concepts.
From operating units to cabinet rows or complex switchgear containers for large systems.

Control technology

PLC & HMI operating and monitoring systems.
Pioneering technologies for operation and monitoring and for process visualization.

Data systems

Software development/ visualization systems.
Development of comprehensive visualizations with maximum transparency across all layers.

Panel shop

CE and UL certified panel shop.
With our own panel shop, we provide highest reliability for your delivery schedule.

Start-up & Service 24/7

Electrical installation / commissioning.
Team of globally experienced professional technicians and engineers for the installation and commissioning of systems “on-site”.

Our offering

Unwinder

Coating Unit

Dryer

Slitter

Rewinder

Automation

Safety

Digitization

Lauer CE-Safety

Expert in all issues relating to CE marking, risk assessment, functional safety, assembly instruction and machine safety

CE Marking & Risk assessment

CE compliance.

From precise risk analysis and risk evaluation following the applicable directives to comprehensive research and analysis of standards (i.e. DIN EN ISO 12100) as well as safety-related review of machinery under construction.

User manuals & assembly instructions

Operating instructions and technical documentation.

We provide full service in creating complete preparation of operating and assembling instructions or alternatively evaluates pre-prepared technical documentation and supports the creating process at the customers site by training.

Functional Safety Engineering (FSE)

EN ISO 13849 application.

Our specially trained control engineers support machinery constructors by designing, verifying and validating safety functions.

ATEX 114 Directive 2014/34/EU.

Professional CE-software

Directives, risks and draw up manuals.

With the right software, these tasks can be completed faster and more efficiently. We offer proven CE-software products that are continuously updated.

Our offering

Connect. Develop. Advance.

We focus on improving processes in production and thus optimizing the efficiency of companies across the entire value chain

IIoT platform

IIoT for your equipment. The platform offers digital intelligence for manufacturing. It connects machines, production and companies. It monitors production and bundles all relevant information for high production quality, resource conservation and low downtimes

Data management

Digitized manufacturing. Manufacturing is brought to a new level. Our solutions enable direct interfaces to ERP-Systems, communication to MES-Systems as well as support traceability through roll protocols

Smart sensors

Smart data harvester. There are many different factors that can influence maintenance cycles and product quality. the@dge unit is simply installed and connected via LAN cable (PoE) and communicates with our IIoT platform.

Turnkey equipment - project example

Equipment for cathode and anode production

Features

- The equipment is available with optional solvent recovery and slitting units to separate the material.
- Loading and unloading of material is fully automated with Automated Guided Vehicles.
- The equipment is connected to the MES-system.
